Attention

Does your school district use Software Unlimited?

If so, we need your help!

Our goal

To connect Express and Software Unlimited, to enhance and simplify your purchase order, approval, and invoice procedures even further!

How can you help?

Submit a program suggestion requesting an Express-Web Link connection. From the main screen of the **School Accounting System**, click "**Program Suggestions**."

After completing the required fields, click the top comment box labeled "**Describe your idea for a program enhancement in as much detail as possible**" and ask for integration with Express.

Sample Comment: "Please add integration with Express (EqualLevel), the online marketplace from Cooperative Purchasing Connection."

What would a connection mean for you?

- Access to Express within your finance system
- Reduce manual order input - no copying and pasting the order and item details
- Maximize spend accountability

Will it change right away?

- No, your ordering process will not change until Software Unlimited and Express build a connector.
- We do not know how long it will take. We do know the more Software Unlimited hears from districts requesting this connection, the higher up the priority list it will go.

Thank you for your time and consideration!
