

The Best Way to Master Science is to Do Science.

We offer a full array of high-quality, hands-on programs covering life, earth and physical sciences for middle and high school students.

We give you everything you need to encourage your students to master science by doing science.

CPO Science features complete, coordinated active learning core curriculum programs rich in STEM connections and aligned to

the Next Generation Science Standards (NGSS). The program includes precision wood equipment modules, student text, investigations manual, teacher's guide, resource material, and technology tools to bring hard-to-grasp science concepts to life.

Achievement results show that the active learning approach of CPO Science makes for more engaged students and better end-of-year test results.

Crazy Traits and Crazy Chromosome

Award-winning modules to help students learn about DNA, genes, gene expression, and genetics.

Item #292-3069
Item #292-3070

Chemistry Models

Explore the structure of atoms, energy levels, and practice balancing equations.

Item #2923066

Wind Turbine

With the Wind Turbine, students explore concepts in engineering, design, energy transformation, electromagnetism, and forces.

Item #292-4028

Accessories & Storage

CPO Science also offers additional equipment and storage solutions to optimize learning and resource management.

Item #392-4100

Core Curriculum Solutions

CPO Science's core curriculum programs are developed to provide a complete hands-on, technology, and textbook learning experience.
